ASSEMBLY INSTRUCTIONS

Brower's One Hole Roll-Out Nest, Model 401RO, allows eggs to roll out of the nest either to the front or to the back. To change directions, reverse two panels--Short Panel (Ref. No. 3) and Tall Panel (Ref. No. 4). Slide Roll-Out Nest Tray (Ref. No. 14) across the short panel and then hook the back of the tray over the edge of the tall panel. The perch stays in the same position. The purpose of the back roll out option is to allow the nest to be mounted inside a structure, such as a coop but with the tray protruding through a slot in the coop. This allows eggs to be collected without having to enter the coop.

For Roll-Out Nest Tray toward the front.
